**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

**Group I**, claim(s) 1-5 and 10-23, drawn to an isolated DNA molecule comprising an inducible pathogenesis-related protein gene promoter, a vector, a host cell, a transgenic plant, and a method of using said DNA molecule to identify an agent.

**Group II**, claim(s) 6 and 10-23, drawn to an isolated DNA molecule comprising a chimeric promoter including at least a non-AoPRT-L gene promoter and an SA responsive element, a vector, a host cell, a transgenic plant, and a method of using said DNA molecule to identify an agent.

**Group III**, claim(s) 7-9 and 10-23 drawn to an isolated DNA molecule comprising at least two promoter sequences arranged in series, a vector, a host cell, a transgenic plant, and a method of using said DNA molecule to identify an agent.

**Group IV**, claim(s) 24, drawn to an agent.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Art Unit: 1638

The technical feature linking Groups I-IV appears to be a DNA sequence that is a salicylic acid-responsive promoter element. However, Shah et al. (The Plant Journal, 1996, Vol. 10, No. 6, pages 1089-1101) teach or suggest a DNA sequence that is a salicylic acid-responsive promoter element (page 1091 Figure 1; page 1095 Figure 7). Therefore, the technical feature linking Groups I-IV does not constitute a special technical feature as defined by PCT Rule 13.2, as it does not define a contribution over the prior art. Accordingly, Groups I-IV are not so linked by the same or corresponding special technical feature so as to form a single general inventive concept. Furthermore, the special technical feature of each of Groups I-III is the specific isolated DNA molecule of each Group, and the special technical feature of Group IV is the specific agent.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
